

MaxFuel_R

A BRIGHTER FUTURE FOR FUEL

Ethically Fuelling Africa & Beyond

Can Africa be a global leader in reducing greenhouse gasses and other airborne pollutants?

Yes

Are greenhouse gas solutions already available in Africa?

Yes

Could every African be part of the solution?

Yes

Join us in our mission to bring affordable, effective, and immediately implementable environmental fuel solutions to Africa and beyond.

All the benefits in the palm of your hand

What is MaxFuelRx?

MaxFuelRx reduces greenhouse gases, particulates, and other gaseous pollutants whilst also increasing fuel efficiency and engine lifespan including combustion system parts.

A pioneering product delivering significant benefits to all

The MaxFuelRx fuel treatment product produces significant environmental benefits, fuel saving benefits, and engine/equipment benefits, passing those benefits directly to the user.

The goal of the MaxFuelRx fuel treatment product is to reduce the greenhouse gas output from daily activities like driving your car or heating your home as well as provide industrial users with cost effective methods to reduce the greenhouse gas output and other pollutants from their operations. With MaxFuelRx, Matrix Petroleum is delivering a world-class solution to Africa and beyond in a challenging global market.

"We wanted to provide people with an opportunity to significantly reduce their carbon footprint without incurring extra costs or having to significantly change the way they run their lives. The MaxFuelRx product does exactly that."

Malvin Chiwanga CEO

A strong commitment to our environmental future

01

Environmental Benefits

In most applications, greenhouse gas production will be reduced by at least 5-7 percent. Our own results often have reductions of 9-13 percent.

Other gas pollutants like hydrocarbon gases, NOx, and carbon monoxide are reduced by up to 22 percent. SOx are reduced by approximately 5-7 percent.

Smoke, including a significant amount of particulates, is reduced by up to 60 percent.

An economical solution for African nations

02

Fuel saving benefits

Consumers should notice a reduction in fuel consumption of at least 5-7 percent and often more. For our industry and government consumers who maintain fuel stocks for long periods of time, diesel bug and other potential contaminant organisms are effectively reduced to zero.

Improving the future fuel landscape to benefit all

03

Engine & Equipment benefits

The ongoing cleaning action increases engine and equipment life, reduces the costs for maintenance and servicing, and reduces downtime required for engine and equipment maintenance.

*Results may vary depending on the engine or boiler type, the age of the equipment, the condition of the equipment, and the operating conditions.

How does MaxFuelRx Work?

MaxFuelRx works by improving every stage of the combustion process.

- ▶ Neutralizes acid
- ▶ Decreases diesel bug
- ▶ Lubricates the engine top end (i.e.pumps, pistons, & valves)
- ▶ Actively cleans the combustion process up to the point of the injector
- ▶ Increases the combustibility of fuels
- ▶ Passively cleans the turbo, exhaust gas recirculation valve, and other areas touched by exhaust gases

While there are some products on the market that do one or two of these items, only the MaxFuelRx fuel treatment product **does all six.**

All the benefits in the palm of your hand

The benefits of MaxFuelRx begin even before the fuel goes into your engine. The sulphur, oxygen, and water present in the fuel are not allowed to come together to form gums and tars through acidification. At the same time, bacterial and fungal organisms that try to grow in fuel over time are eliminated thereby allowing the fuel to be stored over extended periods of time.

When MaxFuelRx is in the engine's fuel tank, the MaxFuelRx actively lubricates and cleans all pumps and other engine parts up to the point of the injector through a scrubbing action.

As the MaxFuelRx passes through the injector into the combustion chamber, the MaxFuelRx assists in atomizing the fuel to ensure the maximum possible surface area for combustion and extends the burn for a fraction of a second longer than other fuels. The temperatures and pressures present in the combustion chamber allow MaxFuelRx to deposit a single protective layer on all metal parts in the combustion chamber.

The cleaning action of MaxFuelRx, along with the work it does in the combustion chambers, significantly increases fuel efficiency while decreasing the creation of pollutant gases and particulates. The cleaning and protective actions of MaxFuelRx reduce engine wear and decrease maintenance and labour costs.

After combustion, the cleaning action continues through a passive process. In engines, this means that turbos, exhaust gas recirculation valves, and emission filters are kept as clean as possible. In boilers, the cleaning action works to significantly reduce any build-up of material in the combustion chamber thereby maximizing fuel efficiency and heat transfer.

Delivering Excellence Ethically Fuelling Africa & Beyond

About Matrix Petroleum

Matrix Petroleum is a Channel Island-based energy group focused on the distribution of petroleum, lubricants and functional fluids, chemicals, and retail convenience services through an extensive network across Africa and the Indian Ocean Islands. Matrix aims to double the number of countries it serves within the next few years.

Since 2018, we have grown our business via our roots in Africa by leveraging the expertise of our employees and distribution networks.

Our aim is to build a strong competency framework within Africa, that competes on a global scale, whilst also forging a foundation rooted within Africa, to sustain and encourage a truly domestic petroleum industry.

MaxFuelRx is our first fully developed product that delivers on this aim, and serves as a strong building block towards a sustainable future for fuel for Africa and beyond.

"We are committed to bringing the best quality, sustainable, and environmentally friendly products to market. Our solution for greenhouse gases and other environmental pollutants can be implemented now."

Join us in making the world a better place."

Malvin Chiwanga, CEO

Meet the Team

Malvin Chiwanga Founder and CEO

Malvin is the founder and CEO of Matrix Petroleum with vast interest in the petroleum, energy, and renewable energy as well as the medical sectors. Matrix Petroleum operates in more than 12 countries worldwide. Matrix Petroleum is a holding company based in Guernsey and has interest in petroleum products, renewable energy, and logistics. He built Matrix Petroleum from humble beginnings in 2018 and transformed it into a multimillion pound company with vast influence in Europe and Africa. The company continues to exceed all expectations under his astute leadership.

Malvin is committed to becoming the environmental leader in the petroleum industry and has introduced the MaxFuelRx brand of fuel products that will significantly reduce greenhouse gas emissions and other important environmental pollutants when individual consumers and industries use Matrix Petroleum's products. This ability to reconcile the challenges of the petroleum industry and provide environmental solutions comes from Malvin's years as a successful businessman, entrepreneur, and philanthropist. Malvin is firmly committed to the idea that successful businesses must give back to the community and Matrix Petroleum is doing exactly that through their environmental initiatives.

Prior to starting Matrix Petroleum, Malvin served as the Head of UnoMedical Southern Africa for ten years from September 2002 to 2012 and was also the Chief Executive Officer and Founder of the AMBITIOUS Group since 2011. During his tenure as Head of Unmedical, Malvin was the highest ranking corporate officer in charge of the entire management of the organisation before he was later appointed to the board of directors of the company based in the UK. Malvin has a vast understanding of stock markets backed by years of experience in trading which has allowed him to set sights on listing Matrix Petroleum on the London Stock Exchange by the end of 2023. He is among the young African business people featured on the glamorous CEO Business Influencers Magazine 2021.

Dr. Gibson Mandishona Chairman of the Board

Dr. Mandishona is an accomplished academic, businessman, director, environmentalist, and philanthropist. His areas of expertise are many and include mathematics and statistics, renewable energy, the arts, among others. Dr. Mandishona continues to contribute his expertise to positively impact the lives of Africans. It is difficult to select which of his accomplishments to mention given that they are so numerous and significant. Most recently, Dr. Mandishona's efforts to improve the environment have resulted in initiatives involving increasing sustainable energy through installed solar panel capacity and biogas plants. Past work in this area has included supervising projects for the UNDP and World Bank.

Nathan Hill Vice-Chair of the Board

Nathan's role as Vice-President of the Board is to bring his logistics and human resource expertise to Matrix Petroleum's operations. An experienced businessman in a number of different industries, Nathan is able to spot and evaluate opportunities that will assist Matrix Petroleum in growing to become the largest environmentally-focused petroleum company in the world. Nathan is an innovator and early adopter of emerging technology. Described by industry partners as a pioneer in pharmacy automation technology, Nathan led his health care company to be the first to implement automated prescription checking technology in North America and the first in Canada to bring automated prescription strip packaging to retail pharmacies.

Nathan has a firm commitment to ethics and works to assist those around him to grow through empowering them with opportunities and the tools they need to be successful.

Prof Pinchas Mandell Chief Strategy Officer

Prof Mandell is a renaissance man, serial entrepreneur, visionary, and futurist that has lived, survived, and thrived in dozens of countries on 5 continents enabling him to see the big picture and how everything is connected to everything else and all of us to each other.

Prof Mandell has been described as the conductor orchestrating the symphony of technologies and ideas which work together in complete symbiotic harmony. Prof. Mandell has over 35 years of experience in advanced engineering & physics research. His other areas of expertise include the management and execution of leading edge engineering research & development programs involving the fields of electronics, computer science, blockchain technology, physics, chemistry, energy, medicine, clean renewable energy, telecommunication, advanced security technologies & systems, environmental clean-up technologies, rapid deployment low cost construction technologies, and advanced water solutions (i.e. as a pioneer in the field of atmospheric water vapor processing technologies).

Prof. Mandell has done numerous consulting jobs for various governments and Fortune 500 companies in the fields of computers, security systems, environmental clean-up, power engineering, telecommunication systems, and major construction projects. Prof. Mandell is an entrepreneur, inventor, and research scientist who has founded 6 companies involved in high tech and has maintained research labs in Russia since 1993 (employing 30 scientists) doing R&D in the above-mentioned fields. Prof. Mandell also has extensive experience in business administration and negotiating complex contracts. He has been Chief Strategy Officer at Matrix Petroleum since 2021.

Augustine Banga Head of International Relations and Special Advisor

Augustine is an advisor to the CEO Malvin Chiwanga. Augustine have previously worked as an advisor for African leaders at government level. he brings this experience to his role of providing strategic planning advice and support to the CEO. Augustine is involved in developing and exploring innovative ideas and concepts, managing projects, and providing direction to the business planning process.

Martin Singh CD, MBA, BPharm, BEng, BSc Chief Technical Officer

As the Chief Technical Officer for the Board, Martin Singh brings his extensive education, experience, and advocacy to

Matrix Petroleum's operations and business plans. With degrees in chemistry, chemical engineering, pharmacy, and a Master in Business Administration, Martin is very capable in ensuring that the science behind Matrix Petroleum's environmental improvement plans is sound. Martin is also responsible for implementing the environmental plans and his years of advocacy in the Sierra Club of Canada at the regional level with the Sierra Club Atlantic Executive Committee and nationally with the Sierra Club National Board give him the credibility required to speak with confidence on environmental issues within Matrix and to the public.

Martin is an analytical and forward thinker who shares the CEO's, Malvin Chiwanga's, vision of having Matrix Petroleum become the environmental leader within the petroleum industry. Martin is an exceptional communicator and will often take the lead in communicating Matrix Petroleum's plans for improving the environment and reducing greenhouse gases.

Simon Silk QC Corporate Legal Counsel

Simon Silk QC is one of the best known and most highly regarded practitioners of commercial law in the United Kingdom. He has a reputation that is second to none for his intellect, legal analysis, and tactically astute approach. Simon is acclaimed for his skills as a stunning barrister and an excruciatingly superb cross examiner. He is equally well known to his clients as a cheerful team player who relishes working on long and complex trials and arbitrations.

Simon's practice focuses on six core areas: commercial litigation, commodities and international trade, energy and natural resources, international arbitration, insurance and reinsurance, and shipping and maritime law. Unsurprisingly, Simon is in high demand for the most challenging and complex cases, especially in disputes involving expert evidence, multiple technical disciplines, questions of foreign law, and those requiring the arguing of difficult or novel legal issues.
